# Willie Anderson

CEO of Leadership in Motion (LIM), Senior ARL Coach, and ICF Certified Coach (ACC).

Willie joined LIM in 1998 and has been actively engaged in Learning Coach assignments worldwide, and in the support of daily operations. As a certified LIM Learning Coach, he has continued to bring value into all LIM service offerings. That value is made possible by working closely with the client and providing well trained Learning coaches.

Most of his professional career has been shaped by his leadership within a Fortune 50 company in various supervisory, management and director roles, and being an internal organizational development consultant. For over two decades he has been providing coaching. Willie also was the chief operating officer (COO) of a small technical staffing company (with 200 employees) for four years, which permitted him to experience management challenges that are vastly different from those of larger Fortune 100 companies.

Willie, whose work experience includes coaching in Europe, Asia, the Americas and Africa, has among his key accomplishments to work with leadership teams in the development of strategic plans, developing the necessary framework for start-up organizations, and ultimately getting organizations functioning more optimally. His greatest desire is to help organizations co-create their future by seeking solutions that are not always found “inside the box”. A cornerstone of his work is a belief that the best solutions come when the entire community is actively engaged in creating that future.
